Subject: Impose harsh penalties on Microsoft, please!

Ms. Hesse,

I believe the government should come down hard on Microsoft. They use their illegal monopoly to stifle competition. They hurt American middle class working folks. Strong regulation and punishment are in order to assure access to the desktop for competitors.

Microsoft is like having only one cable TV company, or one

long distance phone company, or one cell phone company,

or one airline, or one car company. We need competition

and fair access for the little guy to the market.

Please impose harsh penalties and break up the Microsoft

monopoly. Guarantee the right for the little guy to place his products on the desktop.

-Richard Finney
